

DataChart® Palm Relay PDA101

Transport Software for Compact Data Loggers

Combine the versatility of DataChart® Data Loggers with the portability of a Palm™ Handheld

Features

- **Compatible with a wide range of Palm™ handhelds**
- **Download data in the field**
- **Uses Palm™'s HotSync® to transfer data to your PC**
- **Start, stop or check the status of any DataChart data logger**
- **Fast and user-friendly**

Description

Monarch's new Relay 1 transport software gives you immediate access to your data loggers even if they are in the field. Need to download data on the go but can't take your laptop? Simply connect your Palm hand-held to the data logger, download and you're on your way. Need to read multiple loggers? You are only restricted by the memory capacity of your handheld. Transfer to your PC is a snap. At your desktop, Palm's HotSync® downloads the captured data and you're done. From checking the status of your logger to resetting read rates, Monarch's Relay 1 transport software helps keep you mobile. Monarch's Relay 1 is compatible with the Palm m125, m130, m500, m505 and m515 series handhelds using PalmOS® 4.0. It offers a simple "**Download Data From Palm**" feature, making data transfer as simple. Once the data is downloaded to your PC, you can take advantage of Monarch's easy-to-use, Windows-based software package to effortlessly display and analyze data. A variety of powerful tools allow you to examine, export and print professional looking reports with the click of a mouse.

Palm PDA not included
